

SPRINT-1

SENDGRID ACCOUNT CREATION

The screenshot displays the Twilio SendGrid dashboard interface. On the left is a vertical sidebar with navigation links: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, and Settings. The main content area has a light blue header with the text 'To get up and running quickly, please follow the steps outlined below.' and an illustration of two people running. Below this is a dark blue banner that reads 'Send your first emails with Twilio SendGrid'. The primary section is titled 'Create a sender identity' and includes explanatory text about the necessity of a sender identity and the recommendation to create a 'Single Sender'. Two buttons are provided: 'Create a Single Sender' and 'Authenticate a domain instead'. To the right, a diagram illustrates the concept of a sender identity using an email header example: 'Your Business' as the name and '<jane.doe@your_business.com>' as the email address.

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

Your Business <jane.doe@your_business.com>
